# ABOUT SAT CARGO

Sat is an innovative and customer centric freight forwarding & logistics company providing freight forwarding services by air, sea & road freight. We believe in investing for the future and the core to our success is our people, infrastructure and information technology.

The way we bring success to our customers business is also in the reinvestment and evaluation of our business processes, and managing the constant changing environment by becoming an extension of their business, by offering dedicated account management and listening to your needs and requirements.

Our modern and fully equipped facilities have the capabilities of providing a full service import and export warehousing solution, we partner with our agent partners to provide worldwide freight forwarding services.

Sat is Proud to be in WCA Family with a fully comprehensive and approved supplier base, with the same ethos and goals to ensure that each shipment is handled with precision and quality from start to finish

SAT CARGO - Sustainable solutions for perishable goods

# WAREHOUSE LOGISTICS

SAT Cargo offers a wide range of customized services to support the inbound logistic of our clients.

It's not only about the transport of products to the client's warehouse, but also other services like the restock of components in synchronization with the production, the management of Value-added services like the support with customs procedures and the availability of our logistic centers for the deposit of goods.

Our competent IT department has developed the Tracking & Tracing system for the traceability of goods arriving from every part of the world and with every type of vehicle, to keep the client constantly informed.

Thanks to widespread presence on the Italian territory and to our strong competence, SAT is the ideal partner to manage your warehouse logistic.

SAT, develops customized projects to meet the requirements of the clients, from smaller warehouses to bigger ones.

SAT CARGO logistics warehouses are constantly modernized and can therefore offer:

- developed informatics systems to always propose the best solution to the clients.
- I.T. competence to develop ad hoc EDI integrated solutions
- access to warehouse data on the web platforms
- new generation security systems
- operative management systems to guarantee maximum efficiency
